

Medallion Healthy Homes of Canada

As one of the leaders in the Canadian Mold Industry, I have used MoldTech software for the past 8 months and found it very useful and a definite time saver. The checklist that the software provides for you to follow along with on your PDA turns bad home inspectors into good ones. I researched the market and found 3 software programs for home inspectors that were very good and MoldTech is the best by far. I would recommend all home inspectors try this software program for themselves to see how easy it is to setup and use as well as how much better your inspections will become thanks to MoldTech. When I train new Medallion partners, MoldTech software use is a whole chapter of my training. Not only does it bring up helpful questions but I am constantly being thanked for bringing Medallion Certified Residential Mold Inspectors up to speed on how a proper report should be written. It all comes down to one thing, your clients deserve the professionalism that the MoldTech report can provide.
